Research News:

Novartis stands behind Zolgensma (onasemnogene abeparvovec-xioi) for the treatment of children less than 2 years of age with spinal muscular atrophy :- Today the FDA released a statement addressing data integrity issues with the Biologics License Application (BLA) for Zolgensma® (onasemnogene abeparvovec-xioi). First and foremost, we are fully confident in the safety, quality and efficacy of Zolgensma. The FDA supports the continued marketing and use of Zolgensma for patients with spinal muscular atrophy (SMA) less than 2 years of age.

Software's used in Pharmacy:

A.D.A.M. (Animated Dissection of Anatomy for Medicine): combines high- resolution graphics with a database of related medical knowledge. ATLAS-plus: provides multimedia instruction in 3 courses, Histology, Gross Anatomy and Embryology; P.S.I.M.P.L.E.: (Problem Solving in Medical Physiology, Logically Explained) is a case-based interactive hypertext program for teaching and learning medical physiology. Pharmkin: teaches principles of pharmacokinetics through computer simulations; Cardio lab: a program simulating cardiovascular pharmacology in a dog model. MacDogLab : simulation of traditional mammalian pharmacology student laboratories illustrating basic principles of autonomic pharmacology. PharmAid: a HyperCard stack designed as an aid in learning and reviewing basic and clinical pharmacology.
